

## ROMAN AMBER RIBBED GLASS BOWL

---

Ro-Imperial, Circa 1st century A.D.

Glass

Height: 12.0cm; Diameter: 20.1cm

Reference: 3275

reference 3275

This impressive Roman glass bowl is of deep amber colour. It is sagged with twenty one vertical and almost diagonal, or twisting ribs all beginning from its concave base. The cylindrical rim has a rounded lip, and there is a single wheel-cut groove on the interior wall of the bowl, just below the rim. The sheer size of this bowl make it quite a unique glass work.

### CONDITION

This important bowl is intact and in a prestine state of conservation.

### PROVENANCE

Ex-H. Benzian collection, Switzerland. Ex-Constable-Maxwell collection of Ancient Glass, UK.
